Not for you if: you want an overnight fix, a replacement for dental treatment, or something you can pick up in a supermarket.

Tender gums and midday bad breath? The problem may not be what you're brushing away.

If your gums feel tender by the evening and your breath turns stale by lunchtime, this is the part a brushing routine alone tends to miss.

Are you suffering from this?

If several of these sound familiar, this guide is written for you.

- You brush and floss carefully, but your gums still feel tender or bleed a little.
- Strong mouthwashes leave your mouth dry or burning.
- You avoid smiling widely in photos because of how your teeth look.
- You are tired of routines with five different products.
- You are over 35 and want to keep the teeth you still have.
- You are self-conscious about your breath by the middle of the day.
- Dental visits keep turning into extra treatments and extra bills.
- You feel like you are doing everything right and it still isn't enough.
- You would rather support your mouth naturally than add another chemical rinse.

Why leaving it alone gets expensive

Leaving it alone rarely costs nothing: gum discomfort left unattended usually means more dental appointments and bigger bills, not fewer.

What is ProDentim?

It is a dietary supplement in the form of a chewable, dissolvable probiotic tablet — described as doctor-formulated, natural, non-GMO, stimulant-free, non-habit forming and gluten free.

How it works, according to the official site

To support the health of your teeth and gums, the site says you need to repopulate your mouth with good bacteria and provide a healthy environment for those strains to grow in. Three strains totalling 3.5 billion good bacteria are combined into one dissolvable candy.

Ingredients and what the website says they do

Ingredient	What the website says	What that means for you
Lactobacillus Paracasei	Supports the health of your gums; helps sinuses stay free and open.	Aimed at the gum comfort most people worry about first.
B.lactis BL-04®	Supports the balance of mouth bacteria, respiratory tract and immune system.	Targets the bacterial balance the whole product is built around.
Lactobacillus Reuteri	Helps with inflammation; supports a healthy mouth environment.	Aimed at keeping the mouth a good place for good bacteria.

Ingredient	What the website says	What that means for you
Inulin	Supports the good bacteria.	Feeds the strains so they aren't working alone.
Malic acid (strawberries)	Helps maintain tooth whiteness.	The cosmetic side — how your smile looks in photos.
Tricalcium Phosphate	Supports tooth health.	A mineral aimed at the teeth themselves.
Peppermint	A natural anti-inflammatory.	Also why it tastes like a mint rather than a supplement.

Find out which of the 3 oral-health types you are

Three questions, thirty seconds, no email. You'll see which type matches you and exactly what to do next.

If you answered: Tender or bleeding gums

The official ProDentim page puts gum health first: Lactobacillus Paracasei is listed as supporting the health of your gums, and L. Reuteri as helping with inflammation.

Your next step: start with the 180-day pack. Gum comfort is the slowest of the three to settle, so the 6-bottle order gives you the longest run inside the 60-day guarantee window.

If you answered: Breath that turns stale by midday

ProDentim's argument is that breath problems come from a lack of good bacteria rather than too little scrubbing — and the 6-bottle order includes the free “Bad Breath Gone” detox bonus.

Your next step: take the 6-bottle order — it is the only one that includes the free “Bad Breath Gone. One Day Detox” bonus, which is the one aimed directly at your answer.

If you answered: Teeth that look duller than they used to

The formula includes malic acid from strawberries, which the website lists as helping maintain tooth whiteness, plus a free “Hollywood White Teeth at Home” bonus on the 6-bottle order.

Your next step: the 6-bottle order, which carries the free “Hollywood White Teeth at Home” bonus. Whiteness is the slowest change to notice, so give it the longer run.

The full PDF guide is free either way — the check just tells you which part of it to read first.

The three things people ask before ordering

“I've tried supplements before and nothing changed.” Then the 60-day guarantee is the whole point — you can try it for two months and send it back if nothing changes.

“It's more expensive than mouthwash.” Per day it isn't: the 6-bottle pack is $1.63 a day, and it replaces nothing you already own.

“I'd rather ask my dentist first.” Sensible. The official site advises showing a bottle to your doctor if you have a medical condition or take prescription medication.
