

ProDentim PDF Guide — presented by Akacen.com

For people who want healthier gums and fresher breath — without another harsh mouthwash.

An independent buyer's guide to **ProDentim** — a chewable probiotic candy for oral health.

What it is: ProDentim is a chewable probiotic tablet that the official website describes as a unique blend of 3.5 billion probiotic strains and nutrients, specially designed for the health of teeth and gums.

Why people look at it: The website points to research suggesting people with good teeth have a high population of good bacteria in the mouth, and claims many common dental products can disturb that balance.

The unique selling proposition: The website claims it is the only product in the world with this blend of 3.5 billion probiotics and nutrients, designed to repopulate your mouth with good bacteria — as a dissolvable candy rather than another rinse.

Why that may matter to you: If you brush, floss and rinse and still worry about your gums or breath, this is a different angle: supporting the good bacteria instead of only attacking the bad. Not a guarantee of results, and not medical advice.

Are you suffering from this?

If several of these sound familiar, you are the person this guide was written for:

- You brush and floss carefully, but your gums still feel tender or bleed a little.
- You are self-conscious about your breath by the middle of the day.
- You have tried strong mouthwashes and they leave your mouth dry or burning.
- Your dental visits keep turning into extra treatments and extra bills.
- You avoid smiling widely in photos because of how your teeth look.
- You feel like you are doing everything right and it still isn't enough.
- You are tired of complicated routines with five different products.
- You would rather support your mouth naturally than add another chemical rinse.
- You are over 35 and want to keep the teeth you still have.

If someone has these problems, ProDentim is marketed as a chewable probiotic that may help support the health of their gums and teeth, support the balance of mouth bacteria, and help maintain tooth whiteness — according to the claims on the official website.

Why leaving it alone gets expensive

Gum discomfort and bad breath rarely fix themselves. Left alone they tend to mean more dental appointments, more procedures, and more money — plus the quiet daily cost of covering your mouth when you laugh. A small daily habit is a lot cheaper than a treatment plan. Always see a dentist for an actual dental problem.

What is ProDentim?

ProDentim is a **dietary supplement in the form of a chewable, dissolvable probiotic tablet** — the website describes it as a probiotic candy you slowly chew, not a toothpaste, mouthwash, or device.

The official website states that inside every ProDentim you'll find 3.5 billion probiotics along with 3 unique ingredients that are clinically proven to support the health of your teeth and gums, plus a proprietary blend of 4 plants and minerals.

The site also describes it as doctor-formulated, and lists the formula as natural, easy to use, non-GMO, stimulant-free, non-habit forming, and gluten free.

Who is this product for?

The ideal customer is: a person who is frustrated by ongoing gum and breath problems, wants to support the health of their teeth and gums, and is looking for a simple daily supplement rather than another rinse or paste.

- **Their goal:** healthier-feeling gums, fresher breath, and fewer dental worries.
- **Their frustration:** doing everything the 'right' way and still not feeling confident about their mouth.
- **Their buying trigger:** a new angle — supporting good bacteria — plus a 60-day money-back guarantee.
- **Who may not be a good fit:** anyone who wants a replacement for dental care, or who expects a guaranteed outcome. If you have a medical condition or take prescription medication, the website advises showing a bottle to your doctor first.

The main problem — and the benefits people are after

The problem. The website's argument is that dental problems are usually blamed on 'bad' bacteria, but that the real imbalance comes from a *lack of good bacteria* — and that common dental products can harm the good bacteria population.

The outcome buyers want. Gums that feel healthy, breath they don't have to think about, and a smile they are happy to show.

Main claimed benefits

According to the official website, ProDentim is marketed to help:

- Support the good health of your gums and teeth.
- Support the balance of bacteria in your mouth.
- Help maintain tooth whiteness (via malic acid from strawberries).
- Support your respiratory tract and help sinuses stay free and open.
- Support a healthy immune system.
- Support restful sleep and good digestion, according to the site's FAQ.

These are claims made by the product website, not proven outcomes. Individual results vary and this is not medical advice.

The questions you're probably asking

- "Is this just another mouthwash in a different package?" — No; it is a chewable supplement, taken once each morning.
- "Will it work for me?" — The site itself says nothing works for 100% of people, which is why it offers a 60-day money-back guarantee.
- "Is it safe?" — See the safety section later in this guide and speak to your doctor.

How it claims to work

The official website explains the mechanism like this: to support the health of your teeth and gums, you need to **repopulate your mouth with good bacteria and provide a healthy environment for those strains to grow in.**

ProDentim is described as a doctor-formulated mix that gathers 3 scientifically proven, potent strains, combining a total of 3.5 billion good bacteria into one dissolvable candy. The site adds that the probiotic candy also targets the respiratory system, supporting the body to stay free from allergies, while also promoting restful sleep and good digestion.

Everyday problem solving

There is no routine to learn and nothing to rinse, measure, or time. You chew one tablet slowly in the morning — the same way you'd have a mint — and carry on with your normal brushing and flossing. That is the practical appeal: it adds about ten seconds to a morning you already have.

The official website also includes a list of scientific references related to the product's ingredients.

Ingredients and what the website says they do

The three probiotic strains named on the official website.

The probiotic strains and natural ingredients listed on the official website.

Ingredient	What the website says	What that means for you
Lactobacillus Paracasei	Supports the health of your gums; helps your sinuses stay free and open.	Aimed at the gum comfort most people worry about first.
B.lactis BL-04®	Supports the balance of mouth bacteria; supports respiratory tract; maintains a healthy immune system.	Targets the bacterial balance the whole product is built around.
Lactobacillus Reuteri	Helps with inflammation; supports a healthy mouth environment.	Aimed at keeping the mouth a good place for good bacteria.
Inulin	Supports the good bacteria.	Feeds the strains so they aren't working alone.
Malic acid (from strawberries)	Helps maintain tooth whiteness.	The cosmetic side — how your smile looks in photos.
Tricalcium Phosphate	Supports tooth health.	A mineral aimed at the teeth themselves.
Peppermint	A natural anti-inflammatory.	Also why it tastes like a mint rather than a supplement.

Manufacturing and quality claims shown on the official website.

Formula attributes listed on the website: Natural Formula · Easy To Use · Non-GMO · No Stimulants · Non-Habit Forming · Gluten Free.

How to use it, and what to expect

The official website's instruction is simple: **slowly chew one tablet every morning** to support the health of your entire body, gums and teeth.

The website does not clearly state a specific results timeline. What it does say is that supply is sold in bottles described as a 30-day supply each, and that its most popular options are multi-month bundles — 60, 90, and 180 day supplies.

Multi-bottle supply packs as offered on the official website.

Safety and who should be careful

The website states that ProDentim has been designed for all ages and medical conditions, that all of the ingredients have been generally considered to be safe and are constantly tested for purity and to ensure against toxins and contaminants, and that it is manufactured in an FDA-approved facility under sterile, strict and precise standards.

- The website advises: if you currently have a medical condition or you're taking other prescription medication, show a bottle to your doctor before taking it.
- This is a dietary supplement, not a medicine, and not a substitute for dental treatment.
- It is not intended to diagnose, treat, cure, or prevent any disease.
- If you are pregnant, nursing, or treating a diagnosed condition, speak to a qualified professional first.

Proof and credibility

Here is what the official website publishes, reported plainly:

- The site displays a star rating stated as being **based on 95,000 reviews**.
- The site publishes named customer testimonials from verified purchasers, along with a doctor endorsement. Under the ProDentim affiliate advertising rules, affiliates may not republish those testimonials or before/after photos in their own promotions — so this guide does not reproduce them. You can read them yourself on the official page.

- The site cites a study published in the Springer Nature publication regarding good bacteria in the mouth, and lists a set of scientific references relating to the ingredients.
- Certification badges are displayed on the official website.

Why choose this

The single strongest reason: it is the only product the website claims combines 3.5 billion probiotics with these nutrients in a chewable candy designed specifically to repopulate the mouth with good bacteria.

- **It takes seconds.** One tablet chewed in the morning — no extra routine to maintain.
- **It's a different approach.** Instead of another rinse that strips the mouth, it aims to support the good bacteria.
- **Risk is capped.** A 60-day money-back guarantee is offered on every bottle.
- **It doubles up.** The site claims support for respiratory, immune, sleep and digestion alongside oral health.
- **Bundles reduce the per-bottle cost** and the 6-bottle order includes free US shipping plus 3 free bonuses.

The old way: harsher rinses, more products, and hoping. **This way:** one small daily habit aimed at the underlying bacterial balance, with a 60-day guarantee behind it.

FAQ

What is it?

A chewable, dissolvable probiotic tablet described by the website as a blend of 3.5 billion probiotic strains and nutrients designed for the health of teeth and gums.

Who is it for?

Adults who want to support gum health, fresher breath and tooth health with a simple daily supplement. The affiliate materials describe a broad audience aged 35+.

How does it work?

The website says it repopulates the mouth with good bacteria and supports a healthy environment for those strains to grow in.

How much does it cost?

\$158 for 2 bottles, \$207 for 3 bottles, or \$294 for 6 bottles (\$49 each) on the official site.

Is there a guarantee?

Yes — a 60-day money-back guarantee, per the official website.

How do I use it?

Slowly chew one tablet every morning.

Are there warnings?

The site says the ingredients are generally considered safe and it is made in an FDA-approved facility, and advises showing a bottle to your doctor if you have a medical condition or take prescription medication.

Simple summary

ProDentim is for people who deal with tender gums, bad breath, and dental worries that brushing alone doesn't settle. It is a **chewable probiotic candy** that claims to help support gum and tooth health, the balance of mouth bacteria, and tooth whiteness. Its strongest selling point is that it is marketed as the only product of its kind combining 3.5 billion probiotics and nutrients in a dissolvable candy made to repopulate the mouth with good bacteria — backed by a 60-day money-back guarantee.
